* 0 - Standard
 B - Bi-directional plates/Mobile (only for 'D' cartridge)
 R - Mobile-Spring assisted (on request)

To change porting position, follow the steps below:

- Secure pump and remove 4 bolts from mounting flange. Move the mounting flange 1 to 2 mm away from housing. Insert one bolt halfway to mounting flange. Install a wrench between the shaft and bolt and turn in the desired way, so that the required position of P1 port with respect to Suction is obtained. Reinstall the bolts and tighten to corresponding mounting torque as provided on page 2.
- Follow similar procedure for changing P2 position. Use wrench between two bolts placed diagonally opposite.

Instruction: Do not remove mounting flange/end cap completely from the housing but only just 1 to 2 mm to avoid the cartridge pin to move out from the housing dowel pin hole. Make sure no piece of paint enters into the gap to avoid leakage. If it is difficult to turn mounting flange/end cap put some hydraulic oil into the pressure port to lubricate the pressure port seals.
